

Truck Imager

Everything you've always
wanted to know about your deliveries!

Optocycle automates your goods receiving process. Thanks to our AI-powered material recognition, we can tell you exactly what materials are included in your shipment. This puts an end to lengthy discussions.

80%

Fewer incorrect deliveries thanks
to our AI-powered material
recognition.

Truck Imager

Features:

- Fully integrated label recognition
- Automatically detects the AVV or product key
- Detects contaminants defined by you
- Detects edge orientation, substrate types, volumes and much more
- Seamless integration into your system is possible

Your benefits:

01 ↗

Confidence in the
quality of the materials

02 ↗

Documentation &
Digital Monitoring.

03 ↗

Fewer
misclassifications.
