

Belt Imager

All the information about your materials on the conveyor belt.

With our AI-powered material recognition, we can tell you exactly what material is on your conveyor belts. This allows you to optimize your processing and get the most out of your material.

100%

Internal quality control.
For all materials.
In real time.

Belt Imager

Features:

- Detects materials fully automatically.
- Works with all conveyor belt speeds.
- Detects grain size, soil types, volumes, and much more.

Your benefits:

01 ↗

Full transparency in the material flow.

02 ↗

Full control over your materials.

03 ↗

Documentation & Digital Monitoring.
