

Train Imager

Everything you've always
wanted to know about your deliveries!

Our AI-powered camera system automatically records and documents the condition of every incoming railcar and its cargo. This helps you defend against unjustified claims for damages and saves valuable time during goods receipt.

100 %

Quality control.
AI-powered.
In real time.

Train Imager

Features:

- Automatic documentation of each railcar, including date and time, railcar number, and images of the railcar from above, the left and the right
- Assignment of the waste code for the loaded material
- Compatible with other software programs
- Works reliably day and night thanks to infrared lighting

Your benefits:

01 ↗

No arguments about the quality of the materials.

02 ↗

Fewer misclassifications.

03 ↗

Documentation & Digital Monitoring.
