

Self Scan

The Driver-Controlled Delivery Process

Optocycle Self Scan digitizes the delivery process. A guided self-service web app walks the driver through the process step by step: from scanning the QR code to reviewing the AI analysis and generating the final delivery slip. This makes paperwork and waiting times a thing of the past.

100%

Digital.
No waiting times.
Full transparency.

Self Scan

Features:

- Easy setup via QR code scan
- Guides the driver through the entire process with clear instructions
- View and review the captured image and the AI analysis
- Capture all delivery data via a digital form
- Automatic generation of delivery slips

Your benefits:

01 ↗

No disputes about material quality thanks to driver validation

02 ↗

Complete documentation & digital monitoring

03 ↗

Significantly reduced waiting and processing times.
